

Moving Bulkheads Start to Finish

The world's finest bulkhead systems for competition,
recreation and leisure aquatic facilities.

"Whether it is new construction, renovation or operation, talk to Natare."

**From fabrication in our modern production facility
to installation in your pool... this is how a bulkhead
system is created.**

Natare bulkheads are rigid and stable, complying with all current FINA,
USA Swimming and NCAA requirements.

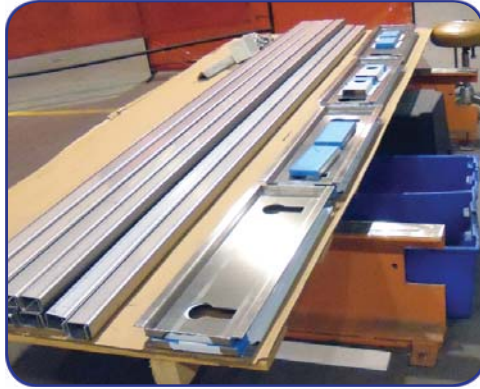

How Natare bulkheads are constructed, shipped and installed.

Natare manufactures the largest and most technologically advanced bulkheads in the world. Our experience has been proven in international competition as well as college, high school and recreational facilities.

Manufacturing:

Bulkhead beginning construction

Bulkhead parts ready for installation

Truss sections under construction

Truss sections under construction

Quality control inspection

Multiple bulkheads in fabrication

Completed bulkheads ready to ship

Bulkhead Start to Finish

Shipping:

Loading onto semi for shipment

Bulkhead leaving our production facility

Installation:

Our bulkheads are installed in both indoor and outdoor aquatic facilities. Each system is custom-designed and built to suit your specific facility and installation requirements. Often delivered in one piece, our bulkheads can also be created in multiple sections to ease installation for buildings or pools that have limited access.

Outdoor Pool Installation:

Arriving at project site

Bulkhead being lifted off the truck

Bulkhead near pool

Bulkhead being set into pool

Installed and ready for use

Indoor Pool Installation (2-Piece Bulkhead):

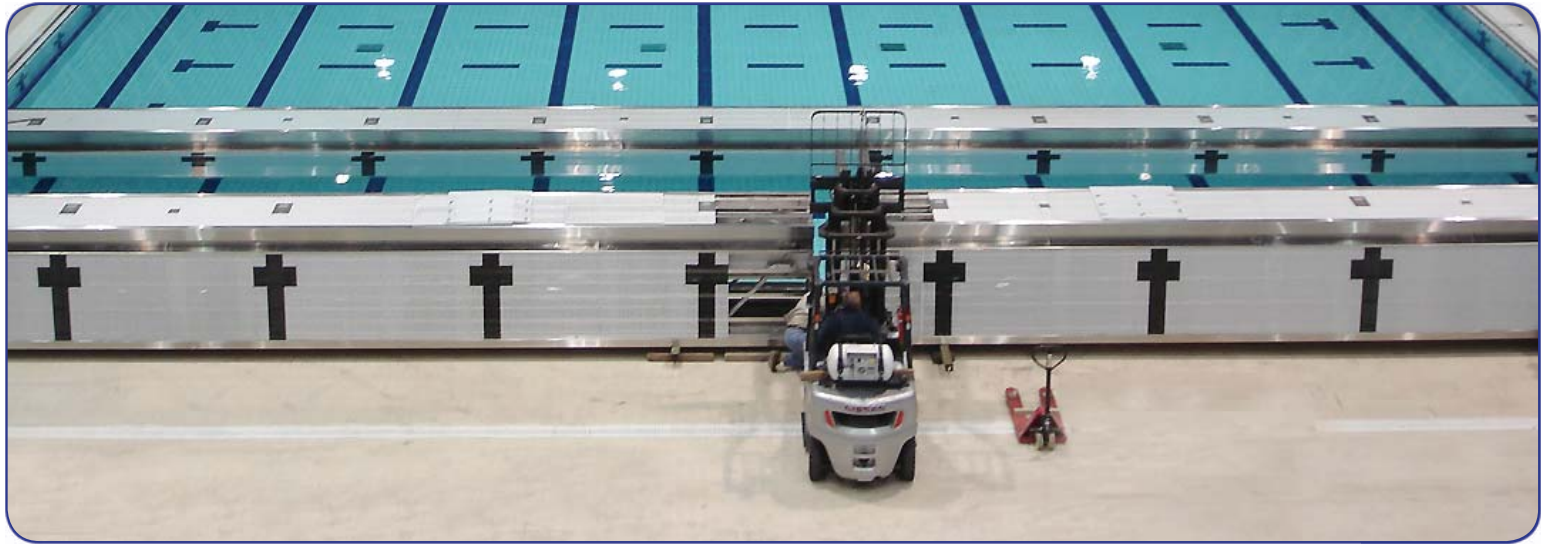

Bulkhead at project site

A bulkhead section being brought into building

Bulkhead sections being joined together

Bulkhead sections being joined together

Bulkhead being placed into pool

Completing installation

Installed and ready for use
