

"THE IDEA THAT ALL POOLS ARE CREATED EQUAL
JUST DOESN'T HOLD WATER."

GPM GRATING & GRATING SYSTEMS

Polymer (GPM) grating systems for swimming
pools, water features and aquatic facilities.

NATARE FACT: Our GPM grating can handle heavy blows from a large hammer and not be damaged.

Pool construction or renovation is fast and efficient with a Natare grating system. Our grating is the toughest and most durable grating available.

Pridham Hall UniSA Australia

TYPICAL GRATING APPLICATIONS:

- Gutter Grating
- Trough and Trench Covers
- Pool Bench Seats
- Access Ramps
- Main Drain and Outlet Covers
- Radius Drains
- Movable Floor Surface
- Deck Access Hatches
- Hydraulic Diffusion Grates
- Backwash Pit Covers
- Pump Pit Covers
- Safety Covers
- Spray Down Area Floor
- Lane Line Storage Cover
- Deck Storage Boxes
- Lifeguard Tower Platform
- Filter Covers
- and much more

NATARE GPM™ POLYMER GRATING

Safe, durable, cost-effective grating for pool renovation or new construction.

Natare GPM grating systems are a long-lasting solution for changing rooms, athletic facilities, industrial applications, and most importantly, perimeter drainage in and around swimming pools, water features, and aquatic facilities. Its unique design has permanently machined flow control slots that allow for a fast water flow through the grating.

There is only one GPM grating and it has been proven in harsh aquatic environments for decades!

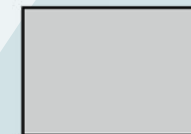

GPM GRATING AVAILABLE COLORS:

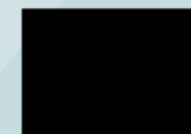

Standard Colors:

WHITE

MEDIUM GREY

BLACK

Optional Colors Group A

(Additional Charges Apply & Longer Lead Times May Occur)

LIGHT GREY

ARCTIC WHITE

SUNSHADE

SEAFOAM

Optional Colors Group B

(Additional Charges Apply & Extended Lead Times Should be Expected)

RED

GREEN

BLUE

ORANGE

EVERGREEN

MOCHA BROWN

YELLOW

EVERGLADE

NATARE FACT: Our equipment and systems are used on six of the seven continents (we are trying for Antarctica).

TYPES OF GRATING AVAILABLE

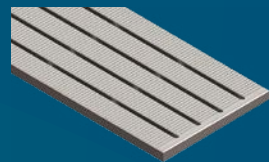

Our GPM grating is available in both Comfort Flow and Competition Flow configurations, grating sections are available with slots parallel to the width or length. Standard grating colors are white, medium grey and black (additional colors shown on page 3).

COMFORT FLOW & COMPETITION FLOW

Available in both Comfort Flow and Competition Flow configurations, grating sections are available with slots parallel to the width or length. Standard grating sections are white in color.

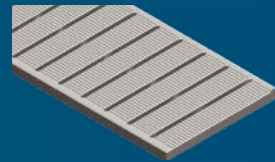

Comfort Flow

Style #1 - Slots parallel to wall

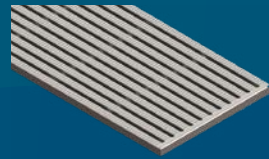

Comfort Flow

Style #2 - Slots perpendicular to wall

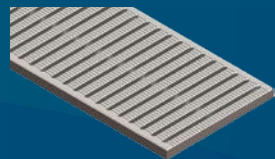

Competition Flow

Style #3 - Slots parallel to wall

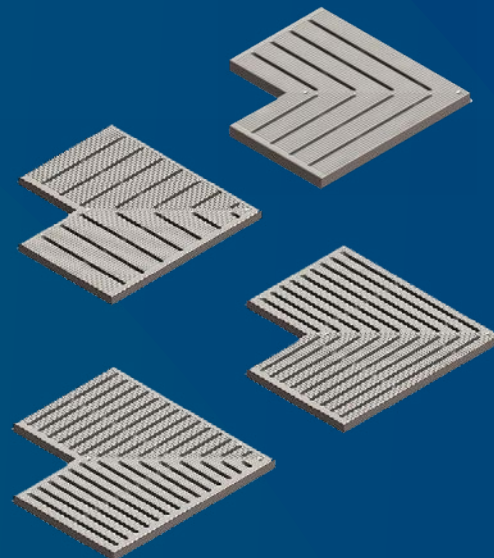

Competition Flow

Style #4 - Slots perpendicular to wall

CORNER PIECES

GPM corner grating is a solid one-piece that is custom manufactured to match the attached grating and pool surround. Corner pieces are available to match any style and size GPM grating available. Each piece is sold separately to create a perfect fit for each corner. Standard sizes are for perfect 90°; but we are able to fabricate any size or shape needed.

All Natare pool grating has a permanent, bi-directional slip-resistant surface that exceeds the ASTM coefficient of friction standards.

WHY GPM?

1 EXTREMELY DURABLE
Environmentally stabilized for harsh sun and tough aquatic environments. Natare GPM grating is made entirely from FDA and USDA-approved materials.

2 BUILT TO LAST
Will not crack, flake, separate, rot, swell, splinter or delaminate when exposed to aggressive water conditions.

3 SLIP RESISTANT
GPM grating has a slip-resistant matte finish on both sides to hide scuffs and scratches.

4 CUSTOMIZABLE
All Natare GPM polymer grating is customizable with embedded inlays and engraving. Add text, logos, or messages in one or two colors.

All Natare grating is impact reinforced, and resistant to UV rays. It also resists frost and damage from freezing, even in the harshest climates.

OTHER AVAILABLE GPM STYLES:

GPM GUTTER OR TRENCH GRATING

GPM grating comes in two standard patterns that allow for optimum water flow to the gutter trough. Both patterns have the matte-textured slip resistant finish machined into the polymer material, which eliminates the need for repairing or refinishing.

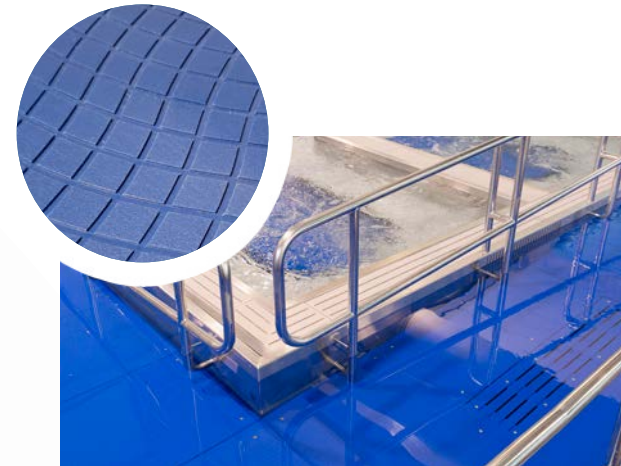

Standard dimensions include nominal widths from 4" (101-mm) to 18" (457-mm) (2" (50.8-mm) increments) Actual width =Nominal width - .315". Virtually any size shape or configuration is available.

NATATREAD™ SAFESTEP™ POLYMER DECKING

SafeStep is a unique semi-rigid polymer overlay with a decorative shaped surface that is incredibly durable, comfortable and absolutely slip-resistant.

Use for ramps, sloped entries, steps and stair surfaces, or just about anywhere that a durable walk, step or access surface is required. Comes in a wide range of colors.

OPTIMAL CUSTOMIZATION

CUSTOM ENGRAVING

All Natare GPM polymer grating is customizable with engraving. Add text, logos, or messages in one or two colors.

EMBEDDED INLAYS

Depth markers, icons, and signs can be embedded into our grating for clear reference of each pool section's depth.

ONE-PIECE RADIUS GRATING

GPM grating is the only solid one-piece grating system available on a radius with the capability of the open areas either perpendicular or parallel to the wall. It is custom fabricated to the specified curve radius; our open areas are consistent and do not have the typical open wedged slots from pool surface to deck edge. There is no chance of little toes or fingers getting caught. This durable, slip-resistant, and easy-to-clean grating system is safe, attractive, and cost-effective.

Natare equipment, systems and services are available from a worldwide network of distributors, representatives and experienced specialty contractors. Whether it is new construction, renovation or operation, talk to Natare.
