

NATARE POOLS

Stainless steel systems for
swimming pools, water
features and aquatic facilities.

"THE IDEA THAT ALL POOLS ARE CREATED EQUAL
JUST DOESN'T HOLD WATER."

Corporation

NATARE POOLS

Natare pools are complete pre-engineered solutions for the construction of virtually any swimming pool, water feature or aquatic environment. A proven system, Natare pools incorporate stainless steel construction in combination with a wide choice of options.

Our modular systems accommodate fully engineered fast, all-welded or bolted pool construction for a pool that is on time, on budget and built right the first time.

Natare pools eliminate typical pool construction problems such as settling, deterioration, leaking pipes, cracking, joint failure, spalling or peeling. Supported by a corrosion-resistant structural buttress system, Natare pools are suitable for virtually any environment.

Natare pools quickly and easily construct to the most popular sizes of rectangular and rectilinear pool shapes. Typical lap or competition pools include the standard 25-yard, 25-meter and 50-meter pools in configurations suitable for all levels of competition or training; they are also available in radius sections or shapes. Natare pools are certified to be structurally sound and self-supporting, whether empty or filled.

Every
Natare pool
begins with
stainless
steel

Natare pools use special grades of stainless steel that provide excellent performance in any swimming pool environment. Unlike other systems, Natare pools do not rely on messy glues and adhesives to make your pool watertight. Our exclusive Natatec® PVC lining offers a colorful finish and can also act as the pool's waterproofing system.

Stainless steel is GREEN; as a construction material, recycled stainless steel is 100% sustainable and has no negative impact on the environment.

WE GIVE YOU OPTIONS

A Natare pool gives you something you won't find anywhere else — options. Whether you're renovating an aging concrete pool and simply need a colorful lining system to make it watertight, or you need a brand new aquatic facility built from scratch, we will tailor a pool for you.

A full range of interior finish options are available to fit your project requirements and budget.

Nothing equals the stability, durability and quality of a Natare pool.

WHY US?

Our rugged, unitized wall system is joined to a self-supporting structural support system called a “buttress,” which ensures pool stability whether empty or filled. The entire system is individually engineered and structurally designed using the most comprehensive computer design and modeling tools to provide a complete three dimensional model long before manufacturing or construction begins. We provide complete and detailed drawings for every pool we produce.

We build your pool’s components in advance, at our Indianapolis manufacturing facility. The pool is then shipped in large pieces, ready for a quick and easy installation on-site in a few days.

Important Features of a Natare Pool System

- certified to all current USA Swimming, FINA, NCAA, YMCA and NAHSA standards
- ideal for recreational swimming, hydrotherapy and water aerobics
- suitable for in-ground, on-ground or elevated construction
- green — 100% recycled stainless steel
- heavy-gauge stainless steel construction
- compliant with most state, municipal and local construction codes
- simple slab-on-grade construction

COMPETITION & TRAINING POOLS

A Natare pool, is quite simply a fast pool, tailored for competitive swimming and training, and certified to all current USA Swimming, FINA, NCAA, YMCA and NAHSA standards.

A Natare pool makes your swimmers fast. Our pools feature more record-breaking swims because they are the perfect competition environment.

Natare pools eliminate the waves and surge that can slow swimmers down. Natare gutters and bulkheads, finished with Natare GPM grating, create a neutral pool environment ideal for training and competition.

Natare pools provide years of trouble-free service with minimal upkeep and maintenance. Sparkling clear and clean water for a perfect competition environment.

ALL-WELDED | AWS POOL SYSTEMS

Natare AWS all-welded pool systems are customized, all-welded unitized pool construction systems, pre-engineered to the exact requirements of each project.

A Natare pool is furnished in corrosion-resistant, easily maintained stainless steel with a number 3 polished finish. Mirror finish, stainless and ceramic tile are also available for special applications.

Natare pools are the ideal choice for in-ground, on-ground or elevated aquatic construction and feature sectional design tailored to the exact configuration of each project. Pool components are pre-fabricated to the required sizes and assembled on-site using TIG welding techniques to form a one-piece, rugged, watertight system.

STRUCTURAL PANEL | SPS SYSTEM

Stainless steel panelized modular construction for fast, cost-effective pool construction anywhere in the world.

Natare SPS pool systems are standardized structural panel pool construction systems, featuring a wide range of shapes, sizes and configurations. Natare SPS pools offer fast, unitized bolted pool construction, pre-engineered to the exact requirements of each project with excellent durability and value.

Natare SPS systems can be built for permanent or temporary use and combined with a Natatec® pool lining system, traditional concrete, tile or plaster pool bottom finishes. Available in standard stainless steel, polished stainless steel finish or NataClad® PVC laminated stainless steel.

Optional ceramic tile pool perimeter surround

NATACLAD POOLS

Stainless steel PVC laminated panelized construction is ideal for temporary pool construction anywhere in the world.

PVC laminated stainless steel; Natare SPS Pools are cost-effective stainless steel pool construction systems that are ideal for value based permanent or temporary installation, institutional, recreational and architectural grade residential construction.

WHIRLPOOLS, SPAS AND HYDROTHERAPY POOLS

Our stainless steel whirlpools and spas are ideal for health spas, hotels, hospitals, rehabilitation clinics and just about anywhere the soothing effects of hot water in motion are desirable. Each Natare system is pre-engineered, easy to install and durable.

Our hydrotherapy pools and spas are offered in a wide range of sizes, depths and shapes with options of complete mechanical and filtration systems, ADA access equipment, rehabilitation systems, counter swim and hydrotherapy jets.

CONSTRUCTION

Natare hydrotherapy pool systems start with our proven stainless steel construction system. In a hospital, clinic or therapy situation, stainless steel is the ideal pool construction material. With its low maintenance, virtually unlimited lifespan and hygienic qualities, whirlpools and spas are the perfect fit.

Spas can be provided with ceramic or tile interiors.

SPECIALTY AND PERSONAL POOLS

When planning a special pool that requires extra creativity, flexibility or structural know-how, Natare offers complete design solutions for today's innovative facilities.

We provide all of the specialty components and equipment for a complete wave pool, water park or water playground attraction. Wave pools, wet playgrounds, spraygrounds and similar water features require a great deal of creativity, flexibility and innovation. Natare offers complete design solutions for aquatic recreation and a wide range of products that address the particular needs of these unique facilities.

UNIQUE SOLUTIONS

We have been involved in nearly every type of swimming pool construction and water feature design project. Past accomplishments include covering an entire mountain (amusement park attraction) in PVC lining, building an indoor water park wave pool on the 12th floor of a resort, to the world's highest, longest elevated pool. Natare has done it all.

Complete pool systems are available for wave pools, water playgrounds, health facilities, whirlpools, therapy pools and other challenging aquatic environments. Whether in-ground, on-ground or elevated, there is a Natare pool to meet your project requirement, construction budget or schedule. Natare gets pool projects done on time, on budget and right the first time.

ELEVATED AND ROOFTOP POOLS

When space constraints or design prerequisites require that a pool goes on-ground, above ground, or on a roof, a Natare stainless steel elevated pool is the answer.

Elevated Natare pools feature modular, fast, “all-climate construction” that moves with the building and buttress systems that support the pool decking.

Hydrostatically tested, joint-free, durable and watertight, a Natare elevated pool provides significant savings and reduced construction time.

Is your construction time frame tight? We can ship your elevated Natare pool in one piece, multiple segments or construct it on-site.

Our elevated pools provide excellent water handling technology and a sturdy, well-engineered design.

Moving the pool to the roof offers an open feeling while not taking up precious space on the ground. This option is also a great solution for environments with poor soil conditions or high water content. Want a pool or spa on several floors of a high-rise condominium? It's no problem. A Natare pool can be designed to fit any space available. Looking to add a multi-purpose recreational pool for guests? A Natare pool can easily be designed to create a unique atmosphere with a variety of depth changes, seating, stairs, spas within the pool and much more.

COMPLETE DESIGN FREEDOM

Natare pools are available in different styles to satisfy any aquatic construction need. We tailor each Natare pool to specific site conditions, construction requirements, program and user needs and often most importantly, budget considerations. Regardless of final cost, each Natare pool is fabricated from the highest quality materials and is carefully made to exacting standards.

“

Leak-proof, durable, and low-maintenance, our pool systems are the proven solution for design, construction and installation problems.

NATARE PRODUCTS AND SYSTEMS

MicroFlo® Perimeter Overflow Systems

Integral perimeter recirculating systems or overflow channel return systems provide the ultimate pool surround. Available in deck-level, semi-recessed or fully recessed configurations in single channel, double channel and positive suction return.

Natafec® Pool Lining Systems

Simply the most durable, cost-effective and functional pool interior waterproofing system available. Build, renovate or remodel pools *your* way with the freedom to create attractive, functional and watertight pool facilities.

Natare Fixed and Movable Bulkheads

The answer to multi-purpose, functional pool systems, Natare bulkheads are world renowned for the perfect competition systems. Vertically deployed or laterally moved, Natare bulkheads are available for any pool configuration.

Grating Systems

Exclusive GPM polymer and PVC profile grating systems for pool surrounds, overflow systems or any pool, spa or recreational environment. The first certified slip-resistant grating with a 10-year full-replacement warranty!

MicroFlo™ Filtration

High capacity stainless steel vacuum sand and pressure filters in vertical or horizontal configurations. Available in sizes suitable for even the largest swimming pools, spas or water features; we sell the most economical, durable and highest purity filtration available. An entire pool recirculation, filtration and control system ready for fast, easy and economical pool or water feature construction.
