1973.

WE GIVE YOU OPTIONS

A Natare pool gives you something you won't find anywhere else — options. Whether you're renovating an aging concrete pool and simply need a colorful lining system to make it watertight, or you need a brand new aquatic facility built from scratch, we will tailor a pool for you.

Orenjestad, Aruba

NATARE POOLS

Natare pools are complete pre-engineered solutions for the construction of virtually any swimming pool, water feature, or aquatic environment. A proven system, Natare pools incorporate stainless steel construction in combination with a wide choice of options.

Our modular systems accommodate fully engineered fast, all-welded, or bolted pool construction for a pool that is on time, on budget, and built right the first time.

Natare pools eliminate typical pool construction problems such as settling, deterioration, leaking pipes, cracking, joint failure, spalling, or peeling. Supported by a corrosion-resistant structural buttress system, Natare pools are suitable for virtually any environment.

Natare pools quickly and easily construct to the most popular sizes of rectangular and rectilinear pool shapes. Typical lap or competition pools include the standard 25-yard, 25-meter, and 50-meter pools in configurations suitable for all levels of competition or training; they are also available in radius sections or shapes. Natare pools are certified to be structurally sound and self-supporting, whether empty or filled.

POOLS BUILT TO LAST

Natare pools use special grades of stainless steel that provide excellent performance in any aquatic environment. Unlike other systems, Natare pools do not rely on messy glues and adhesives to make your pool watertight. Our exclusive Natatec® pool lining system offers a colorful finish and can also act as the pool's waterproofing system.

Our rugged, unitized wall system is joined to a self-supporting structural support system called a "buttress," which ensures pool stability whether empty or filled. The entire system is individually engineered and structurally designed using the most comprehensive computer design and modeling tools to provide a complete three-dimensional model long before manufacturing or construction begins.

We provide complete and detailed drawings for every pool we produce.

We build your pool's components in advance at our Indianapolis manufacturing facility. The pool is then shipped in one piece or multiple sections, ready for a quick and easy installation on-site in a few days.

IMPORTANT FEATURES:

- certified to all current USA Swimming, FINA, NCAA, YMCA, and NFHS standards
- ideal for recreational swimming, hydrotherapy and water aerobics
- suitable for in-ground, on-ground, or elevated construction
- green — 100% recycled stainless steel
- heavy-gauge stainless steel construction
- compliant with most state, municipal, and local construction codes
- simple slab-on-grade construction

Natare can assist with the bidding and planning process, and we will see your project all the way through installation.

WHO IS NATARE?

Natare is respected and known around the world for our stainless steel pools and supply of custom equipment for commercial swimming pools, water parks, and aquatic centers. We are composed of expert-level professionals that are dedicated to making your project ideas come to life.

COMPETITION & TRAINING POOLS

NATARE FACT: Last year alone we purchased over 300,000 pounds of stainless steel.

Visit us online at:
www.natare.com

A Natare pool is quite simply a fast pool, tailored for competitive swimming and training, and certified to all current USA Swimming, FINA, NCAA, YMCA, and NFHS standards.

Our industry-standard competition and training pools last through decades of high activity with little to no maintenance. They include the standard 25-yard, 25-meter, and 50-meter pools in configurations suitable for all levels of competition and training, including Olympic swimming.

Natare pools eliminate the waves and surge that can slow swimmers down. Natare gutters and bulkheads, finished with Natare GPM grating, create a neutral pool environment ideal for training and competition.

Natare pools provide years of trouble-free service with minimal upkeep and maintenance.

Natare's experienced staff combines years of coaching and competitive swimming with hands-on pool construction and operation to produce competition and training pools that work and will keep working well into the future.

FEATURES & OPTIONS:

- moving pool bulkheads designed for complete flow-through wave absorption to prevent wave rebound.
- gutter and bulkhead surfaces finished with safe, slip-resistant GPM grating.
- state-of-the-art perimeter recirculation systems (pool gutters) eliminate turbulence that slow swimmers down.
- air cushion safety sparger (bubbler) systems to cushion a diver's impact and provide a clear visual reference on the water's surface.
- designed and manufactured to meet all FINA requirements.
- our pools last through decades of high activity with little to no maintenance

TWO OPTIONS...

1

ALL-WELDED POOLS | AWS

Natare All-Welded Pool Systems (AWS) are quickly assembled on-site or, for smaller pool configurations, in our manufacturing plant as a single piece or component system. Each section is then joined together on-site with minimal welds to provide a fast and easy installation.

AWS is a permanent, watertight system that works with a variety of different floor systems including our Natatec® pool lining system. Your pool project can have the luxurious curves and sinuous shape of a lazy river while still achieving the strength and stability that only All-Welded Stainless Steel Pool Systems can provide. Interior finishes include polished stainless steel, ceramic tile, and Natatec. Other special finishes are available upon request.

Natare AWS pools are ideal for in-ground, on-ground, or elevated aquatic construction and feature sectional design tailored to the exact configuration of each individual project.

2

We offer many styles to fit your project requirements and budget, including a full range of interior finish options such as polished stainless steel, Natatec pool lining system, or ceramic tile.

STRUCTURAL PANEL POOLS | SPS

Natare Structural Panel System (SPS) is a bolted panelized pool construction system using 12-gauge stainless steel and a fully-welded gutter system. It is available in a wide range of shapes, sizes, and configurations and can be constructed anywhere in the world.

Structural Panel System pools include a robust stainless panel with a strong structural buttress system that can be easily adjusted during installation. It is primarily used for in-ground installation and is shipped as a kit to be assembled entirely on-site. It is also the perfect solution for one-off events where a temporary pool is needed and can be relocated to a new facility.

Available in a variety of shapes, sizes, and standard or custom configurations, Natare pools typically feature an all-welded integral circulating perimeter gutter. The perimeter pool piping or fragile plastic inlets are eliminated, and the automatic surge control weirs eliminate balance or surge tanks.

Dependent upon your pool's requirements, you can choose from a range of interior finishes including our Natatec pool lining system, ceramic tile, or polished stainless steel.

WHIRLPOOLS, SPAS & HYDROTHERAPY POOLS

Our stainless steel spas and hydrotherapy pools are ideal for facilities looking to incorporate the soothing effects of hot water in motion. Each Natare system is pre-engineered, easy to install, durable, hygienic, and low maintenance.

Our hydrotherapy pools and spas are offered in a wide range of sizes, depths, and shapes with options of complete mechanical and filtration systems, ADA access equipment, rehabilitation systems, counter swim, and hydrotherapy jets. Interior finish options include polished stainless steel, tile, or SafeStep™.

17 Wewatta
Denver, CO

McKinney Lofts
Dallas, TX

Single-piece or sectional pools are fabricated in our plant and shipped to the project site for fast and easy installation. Natare spas can be part of larger pools or stand-alone systems to complement any facility design.

BENEFITS:

- durable Natare Stainless Steel Construction
- no staining or cleaning problems
- non-corrosive
- ideal for high temperatures
- no painting
- no delamination from heat or chemicals
- custom-fitted, pre-designed, and engineered
- ADA access equipment

NATARE FACT: We built an entire water park wave pool on top of a 12-story building in Ontario, Canada

SPECIALTY AND PERSONAL POOLS

When planning a special pool that requires extra creativity, flexibility or structural know-how, Natare offers complete design solutions for today's innovative facilities.

We provide all the specialty components and equipment for a complete wave pool, water park, or water playground attraction.

Natare offers complete design solutions for aquatic recreation and a wide range of products that address the particular needs of these unique facilities.

UNIQUE SOLUTIONS

We have been involved in nearly every type of swimming pool construction and water feature design project. Past accomplishments include covering an entire mountain (amusement part

attraction) with our Natatec® pool lining system, building an indoor water park wave pool on the 12th pool of a resort, to the world's longest elevated pool. Natare has done it all.

Fallsview Water Park
Ontario, Canada

Complete pool systems are available for wave pools, water playgrounds, health facilities, whirlpools, therapy pools and other challenging aquatic environments. Whether in-ground, on-ground or elevated, there is a Natare pool to meet your project requirement, construction budget or schedule. Natare gets pool projects done on time, on budget and right the first time.

Marina Bay Sands
Singapore

ELEVATED AND ROOFTOP POOLS

When space constraints or design criteria require that a pool goes on-ground, above ground or on a roof, a Natare stainless steel elevated pool is the answer.

Elevated Natare pools feature all-climate construction that moves with the building and buttress systems that could support the pool decking.

They are lighter in weight compared to concrete pools, making them the preferred construction method for rooftop and elevated pools.

Hydrostatically tested, joint-free, durable and watertight, an elevated Natare pool provides significant savings and reduced construction time.

Is your construction timeframe tight? We can ship your elevated Natare pool in one-piece, multiple segments, or construct it on-site.

Renaissance at Shorelands
Trinidad

Our elevated pools provide excellent water handling technology and a sturdy, well-engineered design.

Moving the pool to the roof offers an open feeling while not taking up precious space on the ground. This option is also a great solution for environments with poor soil conditions or high water content. Want a pool or spa on several floors of a high-rise condominium? It's no problem.

A Natare pool can be designed to fit any space available. Looking to add a multi-purpose recreational pool for guests? A Natare pool can easily be designed to create a unique atmosphere with a variety of depth changes, seating, stairs, spas within the pool and much more.

Private Residence
Memphis, TN

PUBLIC & COMMUNITY POOLS

Natare has been involved in hundreds of pool projects for public, municipal, and community aquatic facilities. We ensure all pools and water features are compliant with all local, state, and federal regulations; and just as importantly, completed on time and on budget.

Each Natare pool is fabricated from the highest quality materials and is carefully made to exacting standards.

QEII
Christchurch, NZ

NATARE FACT: We installed a pool lining system at Area 51, the ultra-secret Air Force base in Nevada.

WATER FEATURES, WAVE POOLS, AND WET PLAYGROUNDS

Beau Rivage Casino
Biloxi, MS

Activity pools with water play features, wave pools, wet playgrounds, splash pads, and similar water features are some of the most difficult aquatic facilities to build and require a great deal of creativity, flexibility, and innovation.

Natare offers complete design solutions for aquatic recreation and a wide range of products that address the particular needs of these unique facilities.

EXPERIENCED PROFESSIONALS

With more than 40 years of experience, Natare has created unique solutions for a diverse array of swimming pools and water features for recreational facilities, swim clubs, community and public pools. These accomplishments in aquatic recreation include covering an entire mountain (amusement park attraction) in our Natatec® pool lining system, building an indoor water park wave pool on the 12th floor of a resort, and completing the world's longest elevated pool.

Leak-proof, durable, and low-maintenance, our pool systems are the proven solution.

HOTEL AND RESORT POOLS

The most popular feature at a hotel or resort is the swimming pool, so it is crucial for the design and layout to be functional, aesthetic, and cater to your desired guests.

Natare pools have been designed, fabricated, and installed for some of the most impressive and awe-inspiring hotels and resorts around the world. Their versatility, strength, and overall appeal allow hotel and resort pools to create a luxurious, but playful environment for guests to enjoy.

From an infinity-edge pool spread across three towers and 200m above the ground to smaller, intimate pools, Natare has a stainless steel pool system for your hotel or resort.

NATARE PRODUCTS AND SYSTEMS

Perimeter Gutter Systems

Integral perimeter recirculating systems or overflow channel return systems provide the ultimate pool surround. Available in deck-level, semi-recessed, or fully recessed configurations in single channel, double channel, and positive suction return.

Natatec® Pool Lining Systems

Simply the most durable, cost-effective, and functional pool interior waterproofing system available. Build or renovate pools your way with the freedom to create attractive, functional, and watertight pool facilities.

Natare Fixed and Movable Bulkheads

The answer to multipurpose, functional pool systems, Natare pool bulkheads are world renowned for the perfect competition systems. Vertically deployed or laterally moved, Natare bulkheads are available for any pool configuration.

Grating Systems

Exclusive GPM polymer grating systems for pool surrounds, overflow systems or any pool, spa, or recreational environment. The first certified slip-resistant grating with a 10-year full replacement warranty.

MicroFlo® Filtration

High-capacity stainless steel vacuum sand and pressure filters in vertical or horizontal configurations. Available in sizes suitable for even the largest swimming pools, spas or water features; we sell the most economical, durable, and highest purity filtration available. An entire pool recirculation, filtration, and control system ready for fast, easy, and economical pool or water feature construction.

Natare equipment, systems, and services are available from a worldwide network of distributors, representatives, and experienced specialty contractors. Whether it is new construction, renovation or operation, talk to Natare.
