

Splash Pads and Wet Play Grounds

Water Features, Wave Pools, SplashPads and Water Playgrounds

"Whether it is new construction, renovation or operation, talk to Natare."

The System that Revolutionized how Swimming Pools are Constructed and Renovated

Natare's innovative design and construction not only reduces the cost of construction compared to typical pools and aquatic playgrounds, but also reduces operational and maintenance costs.

Brought to you by Natare Limited & Natare Corporation

Splash Pads and Water Play Grounds

Complete Design Solutions

Wave pools, wet playgrounds and similar water features require a great deal of creativity, flexibility and innovation. Natare offers complete design solutions for aquatic recreation and a wide range of products. Natare custom designs every product to the particular needs of each unique facility.

Natare Corporation has been involved in nearly every type of pool construction and water feature design project there is—from covering an entire mountain (amusement park attraction) in their revolutionary PVC Lining system, to building an indoor water park wave pool.

Can we build one for you?

Splash Pads and Water Play Grounds

Why Choose Us?

- **Industry Leaders** – Natare has over 25 years of global experience.
- **Innovative Filtration Technology** – Reduce water consumption and simultaneously shrink the size of the required mechanical room.
- **Comprehensive Warranties** – Guaranteed quality comes standard on all products and workmanship by Natare Corporation.
- **Full Design Service** – Natare’s team of engineers make planning your project easy.
- **Turnkey Solutions** – All speciality components, equipment and installation are provided by one supplier for quick installation.
- **Cost-effective** – Reduce construction, operation and maintenance costs. Save on water and electricity.
- **Flexibility** – We offer creative solutions for all shapes, sizes and configurations.

Make Your Water Perfectly Clear with a MicroFlo™ Filtration System

MicroFlo vacuum sand filters are available in different styles to satisfy the unique needs of any aquatic construction project.

We tailor each MicroFlo vacuum sand filter to the specific size, turnover and activity requirements of the project, including specific site conditions, construction requirements, program and user needs and often most importantly, budget considerations. Regardless of final cost, each Natare system is produced from the highest quality materials and is carefully made to exacting standards.

Important Features:

- **Endless design possibilities**—Shape, size, location Toys; with very little restrictions when it comes to design possibilities, let your imagination go wild and together we can produce an outstanding facility.
- **Ease of Installation**—Our installation system allows for a tailored fit for in-ground, on-ground or elevated facilities. Previously difficult projects are made simple with Natare. The drastic reduction of downtime for installation makes it possible to renovate or build your pool facility in record time.
- **Limited weather restrictions**— Natare pool lining systems can be installed in almost any weather—extreme heat or frigid cold.
- **10 year warranty**—Natare gives you piece of mind. You can rest assured that you are backed by an industry leader with 40+ years’ experience. Sit back and enjoy! – Your new pool or water feature will be low maintenance, completely watertight, attractive and durable.

NataDek and SoftDek Leisure Surfacing

NataDek™ and SoftDek™ leisure surfacing creates a comfortable, durable and watertight floor or deck surface area around pools, spas, water play areas, and aquatic facilities.

Specifically designed for wet recreational environments, waterparks, aquatic facilities and swimming pools, NataDek is a specially formulated PVC/polyester composite that can be installed over concrete, tile, masonry and wood surfaces. This waterproof, slip-resistant surface resists staining, deterioration, delamination, cracking and ultraviolet light. NataDek provides a safe and sanitary surface.

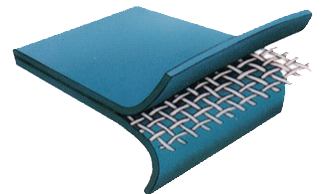

Our Natatec® lining system is far superior to conventional coatings such as paint, plaster, fiberglass, or other short-lived liners. Natatec® outlasts them all, and it's easy to maintain.

Natatec's anti-microbial treatment and non-porous surface will not support bacteria growth. Algae and dirt simply cannot get a grip on our surface.

The Natatec lining system can be made to fit any shape or size. Custom-cut, fitted and fuse-bonded on-site, our system is tailored to each installation.
