

Elevated Pools Start to Finish

Our elevated pool systems are pre-engineered to the exact requirements of each project

"Whether it is new construction, renovation or operation, talk to Natare."

When space constraints or design requirements call for a pool to go above the ground floor, an elevated Natare® Pool is the answer.

Natare pools feature modular, "all-climate construction" that moves with the building and a structural buttress systems to support the pool decking.

Elevated Pools Start to Finish

How Natare elevated pools are shipped and constructed...

Easy to install and virtually maintenance-free, Natare® elevated pools are tailored to each application and installation.

Pool sections are shipped to the project site

The site is prepared for pool installation

Floor joist installation

Pool floor under construction

Floor section installation

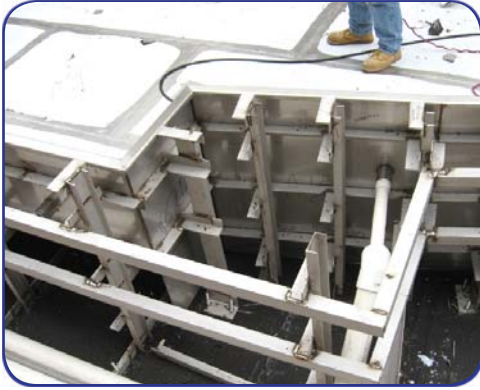

Fabrication of supports for wall sections

Pool frame, ready for installation of wall sections

Elevated Pools Start to Finish

Pool wall corner

Installation of wall section

Installation of stair section

Pool shell, nearly complete

Drain and inlet piping installation

Completed pool
