

NATARE POOLS

Traveling Construction- Swimming Pools

Natare is seeking individuals with field construction experience to install our PVC membrane lining system in swimming pools and water features on project sites throughout the United States.

If you have experience in flooring, roofing, pool construction, finish carpentry, flexible PVC systems or similar skills, we have an interesting, challenging and financially rewarding position for you.

Training is available for the installation of our PVC membrane lining system.

Prior experience in general or specialty construction is ideal. Immediate permanent positions are available with potential for advancement to Crew Lead. Projects include new construction and renovations of swimming pools and water features for commercial and institutional projects throughout the United States. Our past projects include University, Public, and Hotel swimming pools and fountains.

Job Requirements

Prior field experience in general or specialty construction. Willingness to travel. A valid and unrestricted driver's license is required. Extensive travel throughout the U.S. is required with typical project duration from one to three weeks. We will provide paid training for the specific skills required. Transportation and equipment are provided. Lodging, expenses and per diem while traveling are paid.

This is a full-time position with health benefits, 401k, and a wide range of additional benefits are available.
