WHAT IS A POOL RENOVATION?

The cost of new pool construction has increased drastically in recent years, making it an impossible reality for some with outdated, aging, or closed pools. The solution can be as simple as renovating your existing pool or facility to extend its lifespan.

A pool renovation is very similar to renovating a home – you modify the existing structure without having to build from the ground up.

It allows you to maximize your budget by making the most cost effective and cost-efficient updates to your pool or aquatic facility without the high cost of new construction. Renovation will provide a pool to be enjoyed for years to come.

NATARE FACT: Natare is the world's only integrated manufacturer of complete pool systems, including pools, filtration, bulkheads, pool lining systems, and mechanical systems.

FACT:** We installed our first stainless
steel pool in 1973.

WHAT CAN I EXPECT FROM RENOVATING MY POOL?

An effective renovation requires careful evaluation of the condition and performance of the current pool structure, equipment, and mechanical systems such as filtration and recirculation.

At Natare, we provide renovation services that are specifically tailored to your needs and requirements. Once our team knows more about your project, we can help properly select Natare products that will be suitable for your pool or aquatic facility. These services in combination with our engineering support and technical assistance will make your pool like new once again.

HOW DO I DECIDE IF POOL RENOVATION IS THE BEST OPTION FOR MY FACILITY?

Deciding whether new construction or renovation is the best solution for your facility can be a difficult process. Fortunately, Natare has completed thousands of pool renovation projects and has the expertise to guide you along the way. When you choose Natare, you are choosing a dedicated and experienced partner.

PROJECT SPOTLIGHT

CITY OF GLOBE COMMUNITY CENTER SWIMMING POOL

The Natare Trifecta

Working with our pool builder partner, Natare was chosen to provide many aquatic components that would not only extend the life of the pool by many years but would save the City time and money in annual maintenance, and allow additional programming to be added.

To accomplish the City's needs, we utilized the "Natare Trifecta" which incorporates three of our top products, and in this case, the addition of a pool bulkhead.

Supplied Natare Equipment/ Systems:

- Natatec® Pool Lining Systems
- MicroFlo® Filtration
- Perimeter Gutter System
- Natare Movable Bulkhead

PROJECT OVERVIEW

For nearly 10 years the City of Globe Community Center Swimming Pool sat empty. On June 2, 2023, it finally reopened after a major renovation that utilized the "Natare Trifecta" renovation system.

In 2014 the pool was forced to shut down due to continuous water loss and mechanical components that were at the end of their useful life.

- The concealed concrete gutters had failed along with the perimeter piping.
- The pool basin was in major disrepair.
- Lastly, the facility did not have a working filtration system.

For many years after its closure, there were several discussions about making some repairs, but then the COVID-19 pandemic hit.

In 2021, the renovation plans were revived. As discussions proceeded about how the swimming pool would be best used, city residents began expressing their opinions on the types of features they would like to see. Based on that feedback, the City realized the pool needed a complete overhaul to accommodate the growing population and particular needs.

The pool's square footage was doubled in size and the following amenities were added: splash pad, zero-entry area, new decking, pool heater, and a moving bulkhead to allow for competitive swimming.

NATARE PRODUCTS AND SYSTEMS

Perimeter Gutter Systems

Integral perimeter recirculating systems or overflow channel return systems provide the ultimate pool surround. Available in deck-level, semi-recessed, or fully recessed configurations in single channel, double channel, and positive suction return.

Natatec® Pool Lining Systems

Simply the most durable, cost-effective, and functional pool interior waterproofing system available. Build or renovate pools your way with the freedom to create attractive, functional, and watertight pool facilities.

Natare Fixed and Movable Bulkheads

The answer to multipurpose, functional pool systems, Natare pool bulkheads are world renowned for the perfect competition systems. Vertically deployed or laterally moved, Natare bulkheads are available for any pool configuration.

Grating Systems

Exclusive GPM polymer grating systems for pool surrounds, overflow systems or any pool, spa, or recreational environment. The first certified slip-resistant grating with a 10-year full replacement warranty.

MicroFlo® Filtration

High-capacity stainless steel vacuum sand and pressure filters in vertical or horizontal configurations. Available in sizes suitable for even the largest swimming pools, spas or water features; we sell the most economical, durable, and highest purity filtration available. An entire pool recirculation, filtration, and control system ready for fast, easy, and economical pool or water feature construction.

Natare equipment, systems and services are available from a worldwide network of distributors, representatives and experienced specialty contractors. Whether it is new construction, renovation or operation, talk to Natare.
